Use Case Specification: Edit Order

1. Edit Order

1.1 Brief Description

2. The reason for this use case is that sometimes a customer may make a mistake in choosing what they want to buy and may need to be able to go in and edit it before it gets processed.

3. Flow of Events

3.1 Basic Flow

The actor goes to website to edit order, actor selects edit order, system prompts a login request, actor inputs login username and password, system returns actor to order screen, actor edits cake size and flavor.

3.2 Alternative Flows

3.2.1 Edit Order Alternative

The actor goes to website to edit order, actor selects edit order, system prompts a login request, actor inputs login username and password, system returns wrong login username or password, system prompts try again, actor inputs alternative password, system logs actor, actor selects edit order.

3.2.2 Edit Order Fail

Actor attempts to login with username and password, system returns wrong login or password try again, actor enters different password, system returns wrong password or username, actor attempts with other password, system returns wrong password or username, system locks account login for 3 days.

4. Special Requirements

Internet Connection

5. Pre-conditions

Actor must be login

6. Post-conditions

System returns Order successfully edited

System returns Order cannot be edited at this time

System returns 404 error

System returns can't find editor/a134-0af=#\$%

7. Extension Points

Login Use Case.
